

THE MEETING OF EXPERTS

Rerouting to Hamburg

Get ready for the IIBCC 2022 in November! The new location, early-bird registration and call for abstracts are all here. Did you miss out on last year's live forum? Don't worry, we have the recording.

WELCOME

Six months to go!

Dear IIBCC members, sponsors & exhibitors and participants,

The IIBCC 2022 is coming up in November. After what have been some challenging years for all of us in business and life in general - we look forward to connecting again with you in person! We expect to welcome industry players and researchers in the field of inorganic-bonded fiber composites from all corners of the world.

We were originally scheduled to host our conference in Sri Lanka, but the country is currently experiencing a crisis of economic and political hardship. We share the concerns of the members of our community and our hearts go out to the people of Sri Lanka. We hope the country will be on the road to recovery soon.

The Conference Committee has been monitoring the situation closely and has made alternative arrangements, which are now successfully finalised. The IIBCC 2022 will take place in Hamburg, Germany. The new location is a reliable and easy-to-access destination, a top choice for travellers, an economic hub and a smart city.

Date: 15–18 November 2022

Dr Gabriel Büchel

Secretary

IIBCC Conference Committee

Venue: Saalhaus, Hamburg, Germany

You can find details on the **host city Hamburg, travel and accommodation** on our website; see the direct links listed below.

Make sure to secure your attendance as soon as you can, **early-bird rates** apply until 30 June 2022.

Last but not least, please scroll down for the **IIBCC Connect live forum video**. The forum was our first virtual event and the feedback from attendees has been great.

Thank you for your continued support. We look forward to engaging with you.

Yours sincerely,

Dr Gabriel Büchel

ATTENDANCE

Early-bird registration

Click the button below to view rates for delegates, groups (for three or more delegates attending from the

same company) and students. Simply select the applicable option and register for the 2022 conference. The early-bird special ends 30 June 2022.

REGISTER NOW

LOCATION

Host city Hamburg

Welcome – or "Moin" as we say!

The IIBCC 2022 will be hosted in Hamburg, the maritime hub of Germany and the country's second-largest city. Rich in history and vibrant with activity, Hamburg is a city known for its economic and tech drive, quality of life and care for the environment. With its architectural sites, cultural venues, parks, beaches and entertainment on offer, the city has been voted one of the most liveable cities in Europe and remains to be a major destination for tourists from around the globe. CONTRIBUTIONS

Call for abstracts

Are you a researcher or practitioner in the field of fibre composites? Share your insights by presenting your work at the IIBCC 2022! See our page [Submit Work](#) to find out more about the conference topics and dates; templates are also available for download. Deadline for submission of abstracts: 10th June 2022.

UPDATES

What's new online

These pages and details have been added recently to the [official IIBCC website](#):

- [Host City Hamburg](#) - details about the vibrant maritime hub in Germany
- [Venue and Accommodation](#) - the conference venue and where to stay
- [Travel and Visa](#) - details to help you plan your trip
- [Exhibitor Packages](#) - floor plan for the Hamburg exhibition hall

RECAP

IIBCC Connect Live Forum

Innovating for tomorrow

The [IIBCC Connect: "Innovating for tomorrow"](#) live forum took place on November 22, 2021. There were ten presenters and one MC who guided the audience through a series of presentations about ongoing research projects as well as trends in the industry. Attendees found this event both engaging and insightful.

WATCH RECORDING

Some of the feedback we received:

The format was very good.

It would be really good to have an online conference more frequently. The topics are very interesting.

All presentations have been well prepared. Neat and clear. Easy to understand. Summary of each presentation by the chairing professor was brilliant – easy to digest.
